

The Evolution of Clinical Communications

Throughout history, advancements in clinical communications have allowed caregivers to better coordinate patient care and gradually improve patient outcomes. Now that technology has become an integral part of our daily lives, our communication tools have become smaller, faster, easier to use, and more interconnected than ever before.

Let's take a stroll down memory lane and look at the most important historical advancements in electronic clinical communication tools:

1837

Telegraph

Invented in 1837;
Widely adopted in the mid-1800's
 The telegraph proved to be invaluable during the Civil War, and was used to help evacuate and provide care for the wounded soldiers.

Telephone

Invented in 1876;
Widely adopted in the late 1800's
 At its peak in 1975, 95% of homes in the U.S. had landlines. By the latter half of 2016, that number had dropped to under 50%.

1876

1910

PA System

Invented in 1910;
Widely adopted in the mid 1900's
 In 1913, Public Address systems were installed throughout Comiskey Park in Chicago to make announcements and provide musical interludes.

Pager

Invented in 1949;
Widely adopted in the 1980's
 Almost 80% of clinicians still use hospital-issued pagers.

1949

1842

Fax Machine

Invented in 1842;
Widely adopted in the 1980's
 In Japan, nearly 100 percent of all companies and 60 percent of private homes have fax machines.

Cellular Phone

Invented in 1973;
Widely adopted in the 1990's
 89% of healthcare workers use personal smartphones for work.

1973

TigerConnect 2010

Mobile Clinical Communication Platforms

TigerConnect founded in 2010;
Currently being widely adopted

Mobile clinical communication platforms like TigerConnect have revolutionized the way care teams care for patients. Along with providing security and HIPAA-compliant messaging, these tools have become systems of record, display, and action for clinicians.

96% of physicians use consumer text messaging for patient care coordination, and 30% have admitted to receiving PHI via consumer texting apps.

To see how advanced clinical communications have become and where the future is leading, take a look at our TigerConnect and TigerFlow products [here](#).

About TigerConnect

As healthcare's largest provider of clinical communication solutions, TigerConnect helps physicians, nurses, and other staff communicate and collaborate more effectively, accelerating productivity, reducing costs, and improving patient outcomes. With 6,000 facilities, 99.99% uptime, and over 10 million messages processed each day, TigerConnect continually delivers advanced product innovations and integrates with critical hospital systems such as the EHR, nurse call, and scheduling solutions.

The company's commitment to client success is reflected in its broad support organization that works directly with clients at every stage to streamline communication workflows and achieve the highest possible ROI

For more information, follow TigerConnect on Twitter ([@TigerConnect](#)) and visit www.TigerConnect.com to learn how clients like RWJBarnabas, Geisinger, and LifePoint are using TigerConnect to solve healthcare's biggest communication challenges.
