

Automated On-Call Physician Scheduling

- Embedded messaging for faster schedule coordination
- Easier management, lower costs for IT
- Standardized solution across teams and facilities

Integrated or standalone scheduling for better coordination among care teams

TigerSchedule brings on-call physician scheduling and clinical communications together in a single, powerful, easy-to-use platform for automating work assignments. Available as a standalone solution or embedded within the TigerConnect application, TigerSchedule gives staff an intuitive, rules-based scheduling option for quickly creating assignments and making changes on the fly.

Built for physician organizations of any size, TigerSchedule's algorithms ensure fairness in on-call shift assignments and prevent burnout by including sufficient time between shifts. Pre-built workflows mean less work for IT and administrative teams, resulting in greater cost savings. TigerSchedule also integrates seamlessly with TigerConnect's Roles capability for intelligent message routing, on-the-fly secure texting, and automated shift coverage.

Simplified swaps and changes

Allow providers to request and approve assignment swaps right from a smartphone or computer.

Reduced workload for managers

Free up countless hours of toil caused by updating the daily call roster. Easy, cloud-native technology simplifies schedule management.

Automated, easy-to-modify calendars

Carry over custom rules and role assignments month to month and build fair, repeatable, easy-to-manage schedules.

- **EHR Synchronization**
Synchronize patient appointments from the EHR and manage the impact of time-off requests
- **Hassle-Free Scheduling**
Clickable, easy-to-view calendars allow for fast updates reflected in real time
- **Mobile-Friendly Solution**
Smartphone access allows for quick calendar lookups, change requests, and messages to colleagues
- **Effective Resource Planning**
Ensure proper staffing during peak periods and block time-off requests

TigerSchedule Features:

TigerConnect Messaging

Text colleagues directly or set auto-notifications for on-call assignments and schedule changes

Custom Rule Builders

Automate scheduling with custom rules and easy-to-update calendars

Automated Scheduling

Reduce burnout and ensure balance via auto-assign management for time-off requests

Shift Flexibility and Transparency

Easily map to schedule protocols and swap shifts using simple time-off options

Epic and athenahealth Integrations

Synchronize appointment data to block availability and show how time-off requests impact the patient schedule

Custom and Merged Views

View customized daily/weekly/monthly calendars by individual or department

Instantly Viewable Schedule Changes

Roll back timed schedule changes automatically upon expiration to show the originally scheduled provider

Custom Provider Protocols

Easily manage vacation and day-off requests with many time-off options

About TigerConnect

As healthcare's most widely adopted collaboration platform, TigerConnect uniquely combines telehealth, patient texting, and clinical communications in a single, easy-to-use, cloud-based solution. Trusted by more than 6,000 healthcare organizations, TigerConnect maintains 99.99% verifiable uptime and nearly 5 billion user sessions each year.
